On the Farm

The lines on a map form a **grid**. The numbers along the left side and the letters across the bottom of the grid are called **coordinates**. When writing a coordinate, write the letter first and the number second. For example, a cat can be found at E6.

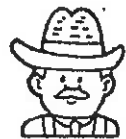

Find each picture on the grid. Write its coordinate.

Try This! Make a list of important places in your town. Using a local map, list their coordinates. Challenge a friend to find them.

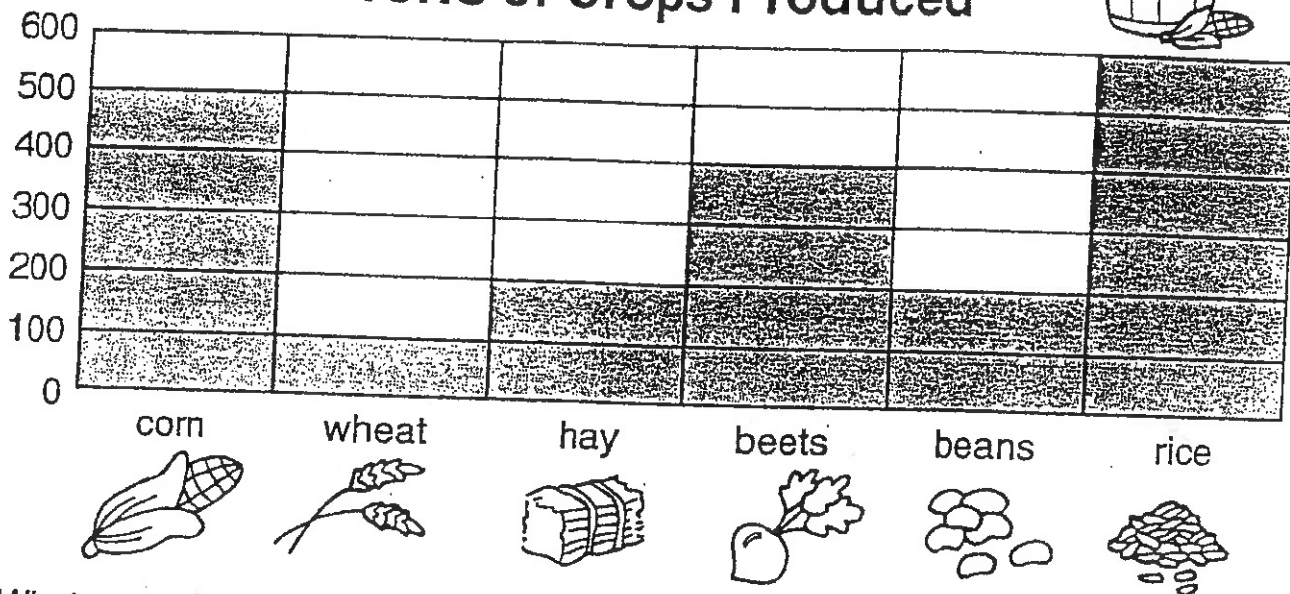

Name _____ Reading a bar

Crop Report

A **bar graph** shows how much or how many in the shape of bars. Josie and Chris made a bar graph showing the amount of crops their community produced this year. Use this bar graph to answer the questions below.

Tons of Crops Produced

1. What crop yielded the greatest amount? _____
2. What crop yielded the least amount? _____
3. The community produced 500 tons of what crop? _____
4. How many tons of wheat were grown? _____
5. How much more rice was yielded than hay? _____
6. How many tons of corn and beans were produced? _____
7. What two crops yielded the same amount? _____
8. If the community had produced 300 tons more hay, how many tons would they have had? _____
9. Which two crops yielded the most? _____
10. Which two crops together equal 500 tons? _____

Try This! Make a bar graph of your favorite foods.
